

ABHINAV JHA

Computer Science & Engineering Student | Aspiring Software & AI/ML Engineer

+91 7739571296 | abhinavcandilyadbg@gmail.com | github.com/Abhinav180305

PROFESSIONAL SUMMARY

Third-year Computer Science Engineering student with a strong foundation in programming, data structures, and machine learning. Hands-on experience building end-to-end web and AI-driven applications, from NLP-based document analysis to interactive recommendation systems. Quick learner with a track record of independently designing, developing, and deploying full-stack projects. Seeking a software development or AI/ML internship to apply strong technical fundamentals to real-world, data-driven problems.

TECHNICAL SKILLS

Programming Languages: Python, C++, Java

Web Technologies: HTML, CSS, JavaScript

Machine Learning / NLP: TensorFlow, Keras, CountVectorizer, Cosine Similarity

AI / ML: Machine Learning, Deep Learning, Generative AI, NLP, Computer Vision, YOLO

Frameworks: PyTorch, Scikit-Learn, TensorFlow, Hugging Face, LangChain, FastAPI

Databases: MySQL, Supabase

Tools & Platforms: Git, Streamlit, AWS

PROJECT EXPERIENCE

Driver Drowsiness Detection System (ML + Computer Vision)

- Developed a real-time driver monitoring system using computer vision and deep learning (YOLO) to detect eye closure and fatigue patterns.
- Implemented OpenCV-based video processing and optimized model inference for real-time performance, ensuring accurate detection under varying lighting and driving conditions.
- Created a custom dataset for the project and built an instant-alert feature to reduce accident risk.

Crop Disease Detection Website

- Built a web application to detect crop diseases from leaf images, supporting both direct photo upload and live camera capture.
- Integrated a weather API to provide relevant environmental context alongside disease predictions.
- Implemented a history dashboard tracking the number of images uploaded and diseases detected over time.

AI Q&A Chatbot (LLM-based)

- Built a conversational Q&A chatbot using a large language model API, deployed through an interactive Streamlit interface.
- Designed prompt handling to deliver context-aware, accurate responses to user queries in real time.

EDUCATION

B.Tech in Computer Science & Engineering — VIT Bhopal University | CGPA: 8.54

Expected 2027

Science Stream — Jesus Mary & Academy

2022

CERTIFICATIONS

- Applied Machine Learning in Python — University of Michigan

LANGUAGES

English, Hindi
